

User Acceptance Test

Questionnaire(Answered by Client) [↗](#)

Please answer the questions in the corresponding sections after user acceptance test.

Do the above user stories meet your expectations? If they do, please answer "yes". If not, please specify the corresponding number and the reason.

Yes

Are there any user stories that you expected to be included but were not completed?

No

Please rate our product on a scale from 1 to 10.

9, it would have been convenient to have a GUI to give the url

Do you have any suggestions or feedback for us?

Thank you for your work! **Please fork it to our organization CHRI-LAB as instructed** [📄 Ending your project | Notion](#)

User Acceptance Test Documents [↗](#)

Workflow:

Considering that the Furhat robot is a real-time voice interaction robot, we will pre-enter the URL and initialize the webpage information before the testing process.

During the test:

As the developer, show:

- 1.Tell me about melbourne connect
- 2.Tell me about latest news in melbourne connect
- 3.Map based chat
- 4.What is the color of aurora in the image of the website.

As the client, you need to speak or type the questions you want to ask Furhat.

I will start a round of conversation by pressing Enter (since we are in a video conference, additional sounds can cause the Furhat robot to mishear what I am saying, so we need to control it using Enter).

I will then repeat your question to the robot, and the robot will respond.

Here are our common test cases and some results:

URL:  Melbourne Connect

Question1: Tell me about Melbourne Connect.

Answer: Melbourne Connect is an innovation precinct powered by The University of Melbourne in partnership with a consortium led by Lendlease. It aims to leverage research and emerging technologies to address global challenges. The precinct unites world-class researchers, policymakers, industry experts, entrepreneurs, and higher-degree students, and is located at the heart of the Melbourne Biomedical precinct. Melbourne Connect features various facilities and services, including event spaces, the Science Gallery Melbourne, the Telstra Creator Space, and the Froebel Early Learning Centre. It also hosts a range of events and provides co-working spaces for collaboration.

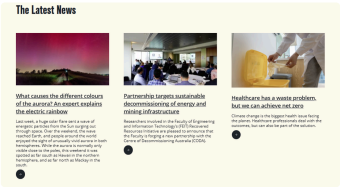

Question2: Tell me about latest news in Melbourne Connect

Answer:

The latest news in Melbourne Connect includes:

1. ****Aurora Colors Explained****: An expert explains the different colors of the aurora. Recently, a huge solar flare sent a wave of energetic particles from the Sun to Earth, resulting in unusually vivid auroras visible as far south as Hawaii and as far north as Mackay.
1. ****Sustainable Decommissioning Partnership****: The Faculty of Engineering and Information Technology's (FEIT) Recovered Resources Initiative has announced a new partnership with the Centre of Decommissioning Australia (CODA) to target sustainable decommissioning of energy and mining infrastructure.
1. ****Healthcare and Net Zero****: Discussions on how healthcare, which faces significant waste problems, can achieve net zero emissions. The article emphasizes that while climate change is the biggest health issue facing the planet, healthcare professionals can also be part

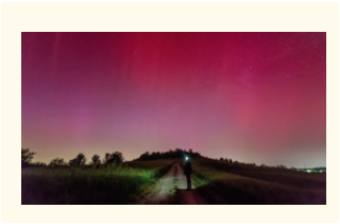

of the solution.

Question3: What is the color of aurora in the image.

Answer:

The image of the aurora on the website shows vibrant colors, primarily shades of red and pink. These colors are visible in the sky above a landscape, creating a striking and beautiful visual effect.

User Story of web scraper achieved 

The Demo video shows our function corresponding to the following user story:

[Demo video \(youtube.com\)](#)

User Story	Progress	Priority
------------	----------	----------

1.As a user interested in services offered at Melbourne Connect, I want the robot to provide detailed information.	Done	Must Have
2.As a user, I want the chatbot to automatically extract and summarize the main content of a website I provide, so that I can quickly grasp what the website is about without reading all the content.	Done	Must Have
3.As a user looking for entertainment or news, I want the chatbot to recommend and summarize articles, blog posts, stories, or provide me with the latest headlines based on my interests, so that I can easily find engaging or informative content.	Done	Must Have
4.As a job seeker, I want the chatbot to compile job listings from various websites, so that I can find opportunities that match my skills and preferences more easily.	Done	Must Have
5.As a user doing research, I want to ask the chatbot specific questions about content found on academic or scientific websites, so that I can gather information efficiently for my studies or work.	Done	Must Have
6.As a user, I want the robot to avoid answering questions that are unrelated to website navigation content or involve sensitive information, and to inform me when my queries are outside the scope of available information, to maintain professionalism and set clear expectations.	Done	Must Have
7.As a user, I want the robot to describe images and visual content from websites, so that I can comprehend visual information.	Done	Should Have
8.As a user, I want to interact with the furhat robot, so that I can get	Done	Must Have

information from it.
